

LAKSHAY AGGARWAL

Ghaziabad, Uttar Pradesh | +91 8700276124 | lakshayagarwal2005@gmail.com | linkedin.com/in/lakshay-aggarwal-dev | github.com/LakshayAggarwal12 | LeetCode

PROFESSIONAL SUMMARY

Full-stack developer and Computer Science (Data Science) undergraduate with hands-on experience building end-to-end web applications using the MERN stack (MongoDB, Express.js, React, Node.js). Proficient in designing RESTful services, integrating LLM APIs (Gemini), and delivering cross-platform, cross-device compatible experiences. Experienced in data storage across both NoSQL (MongoDB) and relational (MySQL) paradigms, with exposure to React Native for mobile development. Competitive programmer with 100+ LeetCode problems solved and a top-20 finish among 400+ teams at a national hackathon. Eager to contribute to cross-functional teams delivering complete user experiences across web and mobile.

TECHNICAL SKILLS

Languages:	JavaScript · Python · C · C++
Frontend:	React · React Native (learning) · HTML5 · CSS3 · Responsive / cross-device UI
Backend:	Node.js · Express.js · FastAPI · RESTful API design
Databases:	MongoDB (NoSQL) · MySQL (RDBMS)
AI / ML:	LLM API Integration (Gemini) · Prompt Engineering · NLP Fundamentals · Data Preprocessing
Tools:	Git · GitHub · NVM (Node Version Manager) · Jira

EXPERIENCE

Generative AI Intern — IBM PBEL Virtual Industry Program	Jul 2025 – Aug 2025 Remote
- Designed and implemented end-to-end data processing and inference pipelines for structured inputs using Python and generative AI workflows. - Applied core ML techniques including data preprocessing, feature handling, and model evaluation to deliver actionable outputs from structured datasets. - Gained practical exposure to generative AI through problem-solving in a virtual industry environment, reinforcing production-grade development practices.	

PROJECTS

Nano-Nanny — AI Post-Discharge Patient Monitoring System	Apr 2026
MERN Stack (MongoDB, Express.js, React, Node.js) · Gemini API · RESTful Services · GitHub Live Demo	
- Built a full-stack, cross-platform healthcare web application for post-discharge patient monitoring and real-time symptom tracking using the MERN stack. - Designed and exposed RESTful service endpoints for patient report management, real-time monitoring, and AI-assisted interaction, ensuring cross-device compatibility. - Integrated Gemini API to deliver contextual health insights and intelligent AI-assisted patient interaction, improving continuity of care for discharged patients. - Managed data persistence using MongoDB for unstructured patient records and applied NoSQL best practices for scalable document storage.	
AI Research Agent	Oct 2025
Python · NLP · Web Scraping · GitHub Live Demo	
- Engineered an AI-powered research assistant that automates web search, content extraction, and text summarization, significantly improving research efficiency. - Implemented source ranking and filtering algorithms to surface the top 5 most relevant results from large web datasets. - Developed automated summarization workflows using NLP fundamentals to enhance information accessibility for end users across platforms.	

EDUCATION

B.Tech — Computer Science and Engineering (Data Science)	Sep 2024 – Jul 2028
---	---------------------

ABES Engineering College, AKTU | CGPA: 8.95 / 10 (First Year)
Relevant Coursework: Data Structures & Algorithms, OOP, Probability & Statistics

Senior Secondary — Class XII, CBSE2024

DAV Public School | 90.4%

Secondary — Class X, CBSE2022

DAV Public School | 97.5%

CERTIFICATIONS

IBM PBEL Generative AI Program Certificate (Expected Aug 2025) | Add Internshala / Coursera certifications in Web Development, Node.js, React if earned

ACHIEVEMENTS

- **HCL-GUVI Hackathon — Top 20 of 400+ Teams:** Ranked among the top 20 teams out of 400+ participants at the HCL-GUVI National College-Level Hackathon (Oct 2025), demonstrating ability to deliver full-stack solutions under time constraints in a cross-functional team.
- **Competitive Programming:** Solved 100+ problems on LeetCode with active participation in rated contests, reinforcing strong algorithmic foundations for backend development.
